DISCLAIMER: All colors represented here are affected by age, light, heat and the printing process; therefore, chips in this literature may vary from the actual coating in the container. To achieve clarity and depth of color, some finishes may require multiple coats. Custom colors may be higher in price. Colors will vary depending on the type, age or condition of the wood. Colors are matched under daylight for accuracy. Colors can vary if viewed in different light sources.

FOR ADDITIONAL STAINS IN DIFFERENT TRANSPARENCY LEVELS, TRY:

TRANSPARENT STAINS

Accentuates wood's beauty by lightly toning it with transoxide pigments, enhancing the finish when a more natural appearance is desired.

SEMI-SOLID STAINS

Semi-solid stains provide greater opacity while still allowing the texture to show, for a subtle yet rich look.

SOLID STAINS

These completely opaque, long-lasting colors allow the natural texture of the wood to show through with the maximum level of UV protection.
