## Professional Stripper Paint & Varnish Remover

### Packaging

SIZE	CASE PACK	CASE WEIGHT
3.78 litre (1 US gallon)	2	10 kg (22 lb)
18.9 litre (5 US gallon)	1	30 kg (65 lb)
205 litre (55 US gallon)	1	300 kg (650lb)

### Specifications

SOLVENT:	Methylene Chloride
COLOUR:	Clear to White
OPACITY:	Transparent to Milky
ODOUR:	Characteristic
VOC RANGE:	260-290g/L (2.2-2.4 lb/gal)
FLASH POINT:	N/A
FLAMMABILITY:	Non-flammable
APPLICATION TEMPERATURE:	5-30°C (40-85°F)
APPLICATION HUMIDITY:	N/A
OPEN TIME	15-60 minutes
SURFACE COVERAGE:	10m <sup>2</sup> /L (400ft <sup>2</sup> /US gal).
SHELF LIFE:	10 years (unopened)

### Product Description

**Swing Professional Strippers** are clean, non-grain raising strippers designed for removing paint; varnish; polyurethane; lacquer; moisture cure, etc. They do not contain any caustic or water, and are non-flammable. **Swing Professional Strippers** come in four formulations: **Swing Professional Flo Stripper (1893)**, a very low viscosity remover for spraying and overflow tanks, as well as a stripper wash or as a diluant for stripper tanks that have become too thick; **Swing Professional Liquid Stripper (1897)**, a low viscosity remover for spraying, standing baths and dip tanks; **Swing Professional Gel Stripper (1899)**, a high viscosity remover that is ideal as a first stage remover for difficult finishes and for standing baths; **Swing Professional Super Stripper (1891)**, an extra strength remover for catalyzed, moisture cure and epoxy finishes.

### Recommended Uses

**Swing Professional Strippers** can be used on wood, metal, masonry, and brick. Always test the stripper on a small, inconspicuous area for application on plastic surfaces. **Swing Professional Strippers** are recommended for interior and exterior use.

### Directions

**Surface Preparation** - Remove handles and knobs. Clean surface to remove wax and dirt with TSP and warm water, or other applicable cleaner.

**Application** - Brush on a liberal amount of **Swing Professional Stripper**. Wait at least 2 minutes for the finish to bubble or dissolve. Remove the dissolved finish using a brush or **Circa 1850 Maple Scraper** to prevent gouging on wooden surfaces. If finish is exceptionally thick, and some residue remains, repeat the procedure a second time. When all the finish has been removed, wash down the surface with mineral spirits or water using medium (00) synthetic pad. No afterwash is required for **Swing Professional Flo Stripper**.

**Dry Time** - Allow the surface to dry thoroughly (1 hr under normal conditions) prior to applying a topcoat. High humidity or low temperatures may slow drying.

### Caution

Store container in a cool, dry place. Always wear **Circa 1850 Stripping Gloves** (impermeable rubber gloves) and protective eyewear. Work in a well ventilated area. In case of contact with eyes or skin, flush thoroughly with water. If swallowed call physician immediately.
