

Description :

The C20 Cleaner/Degreaser is a versatile and multi-purpose detergent. It effectively removes grease, oil stains, organic residue, and various other substances from any type of substrate. Its formulation excludes petroleum solvents and caustic products, making it a biodegradable detergent that is safe for both the environment and the user.

Advantages :

- Neutral pH
- Low odor
- Biodegradable
- No neutralization required after rinsing
- Does not damage substrates
- Safe
- Concentrated

Chemical Description:

A blend of biosolvent and non-ionic surfactant agent in an aqueous phase.

Technical Data:

- Physical state: liquid
- Color: translucent
- Odor: low
- Density (kg/l): 1.01
- pH: 7
- VOC: not applicable
- Melting point (0°C): <0
- Boiling point (0°C): ≈ 100
- Solubility in water: complete

Available Formats:

- Pinte : 946ml
- Gallon : 3.78L
- 5 Gallons : 18.9L

Technical Data Sheet C20

Restrictions:

Before any large-scale manipulation, a test on a small part of the substrate must be performed. Work in the shade if possible. Do not work in direct sunlight. Cleaning with too high a concentration or too many successive cleanings can damage the substrate finish. Do not clean the substrate at temperatures below 5°C, including the substrate temperature, or when freezing is expected within 24 hours after cleaning. Ensure that all other components installed near the substrate to be cleaned have completed their curing.

Sampling:

Before starting the cleaning on the entire project, perform a cleaning sample on a small part or on a less visible part of the substrate to be treated. A sample of 1 square meter is recommended. After the cleaning test, let the substrate dry for a period of 3 to 7 days depending on the weather and external temperature. You can then evaluate the result of the cleaning test.

Dilutions :

The C20 Cleaner/Degreaser is used in several dilutions depending on the type of dirt.

Concentrated/pure: oil, grease

1 part product to 1 to 3 parts water: oil, grease

1 part product to 4 to 6 parts water: organic residues and various stains

1 part product to 7 to 10 parts water: maintenance cleaning

Application Method:

Brush

Sprayer

Low-pressure foamer

Yield:

Coverage of 30 ft² to 100 ft² per liter

Coverage varies depending on the substrate porosity and the type of dirt to be cleaned.

Application :

The C20 Cleaner/Degreaser is applied to a dry surface. Therefore, avoid pre-wetting or applying to an already wet surface. Apply the C20 Cleaner/Degreaser to the surface.

For tougher deposits that require a higher concentration of solution, foam the solution using a brush and let the solution act for a minimum period of 15 minutes. Do not let it dry. Brush well and rinse with clear water. Repeat the steps if necessary.

For organic residues and others, apply the solution according to the recommended dilution and let it act for a minimum period of 15 minutes. Brush at the beginning of the application to foam the product. This way, the solution will perform its work and will be less likely to penetrate the substrate completely. Do not let it dry. Brush and rinse with clear water. Repeat the steps if necessary.

In the case of simple maintenance cleaning, apply the solution to the surface to be cleaned according to the recommended dilution in this datasheet. Let the solution act for a period of 1 to 2 minutes. Scrub and rinse the product with clear water. Repeat the cleaning if necessary.

In all cases, you can let the solution work longer. Simply note that the solution should not dry.

storage:

Protect from freezing.

Technical Data Sheet C20

In temperatures ranging from 5°C to 30°C, and in the sealed delivery container, the C10 surface preparer can be stored for a period of 1 year.

Health and Safety:

Caution! Causes skin irritation. Causes serious eye irritation. Wash thoroughly after handling. Wear protective gloves/protective clothing/eye protection/face protection. IN CASE OF CONTACT WITH SKIN: Wash with plenty of water. IN CASE OF CONTACT WITH EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Specific treatment (see additional first aid instructions on this label). If skin irritation occurs: Get medical advice. If eye irritation persists: Get medical advice. Remove contaminated clothing and wash before reuse.
